VIRIdiVITA® herbs

VIRIdiVITA® herbs is a roof herb mix with select plants suitable for the location and for the extensive living space.

The seed mix consists of pure Swiss ecotypes. They come from their natural living space. They are plants which withstand the most extreme conditions, develop over the years into an extensive greenroof, and are capable of adapting themselves to the constantly changing climate conditions. Indigenous plants in extensive spaces are also the basis for a diverse and gloriously colourful fauna.

VIRIdiVITA® herbs type A: growth height to max. 20 cm

VIRIdiVITA® herbs type B: growth height to max. 50 cm
